

# Accelium Journey

Accelerating growth, performance, and change with an innovative digital game-based learning program

# Accelium Journey

Learning and growth is a never ending road

Accelium's Journey offers online game-based learning process that are based on the Accelium method - a proven teaching methodology that is currently taught in more than 40 countries around the world.

With the immediacy and enjoyment of the game experience, participants will enhance their thinking, planning, and management skills, as well as their social and interpersonal skills.

Participants in the Accelium Journey will receive personal workouts in the Accelium system - these challenging workouts will help participants become more conscious of their thought processes and examine their performance more closely.

The learning journeys are customizable and deal with a variety of high order skills such as problem solving, decision making, flexibility, analysis and deduction, drawing conclusions and more. They build the knowledge base of each participant from the ground up, while dynamically adapting the content to the strengths and weaknesses of the learner.

# How it works?

## The Accelium Journey runs for five weeks and includes:

### Kick Off

- ✓ This online kickoff session introduces participants to the Accelium methodology
- ✓ Get acquainted with the digital system
- ✓ Discover what they will learn during their thinking journey
- ✓ During the opening session, each participant is encouraged to set personal goals.

### Independent learning

There will be 4 additional one-hour sessions over the next three weeks dedicated to:

- ✓ Discovering tactics, tools, and concepts from the world of thinking
- ✓ Transfer and application of the tools and ideas learned in the game context to everyday dilemmas in the workplace

### 360 Assessment & summary

As the journey concludes, participants take a 360-degree diagnostic test which maps their thinking, decision-making, and problem-solving skills, and generate a personal report rich in insights.

Start

5 weeks implementation

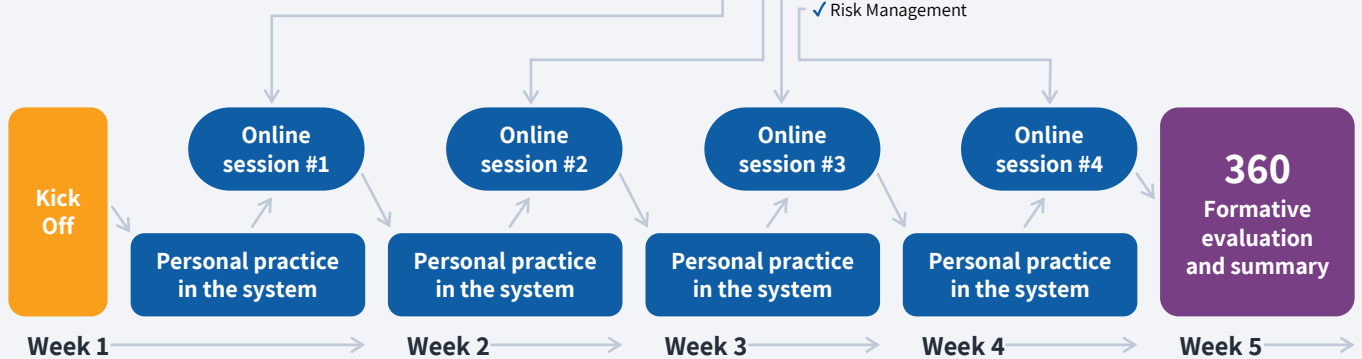

# Structure

The program combines online learning sessions with in-app personal training sessions. The online group learning sessions consist of a master class (60 minutes) on a topic you select in advance from the list provided.

The master classes will be held once a week, during which time participants will practice using the Accelium system.

Create your Journey -  
Select Your Subjects for each week

- ✓ Identifying the Problems Core
- Paving a Route
- ✓ Dealing with a Change
- Identifying Anchors
- ✓ Identifying Key Points
- Creative Thinking
- "The Eliminating Alternative Tool"
- Resilience
- Group Structure
- ✓ Risk Management

## Workout #1

# Identifying the Problems Core

## Description:

In this workout, we will deal with system problems. A system is a collection of components linked together and functioning together for a common purpose. When one of the components stops working, a problem arises!

System problems are more common than you may think: A vehicle that stopped working, a team whose performance is inadequate or unsatisfactory, a product that does not function as planned... and more!

When the system is not functioning, we need to respond quickly and identify the problem's core.

## About the game:

**Move It** is the leading game in this workout. It's a challenging puzzle game where you have to get the mover out of the room by moving furniture and clearing his path to the door.

## Main Skill:

Problem Solving

## Sub- Skills

Analytical Thinking

Systematic vision

Planning

Following Move Order

## Workout #2

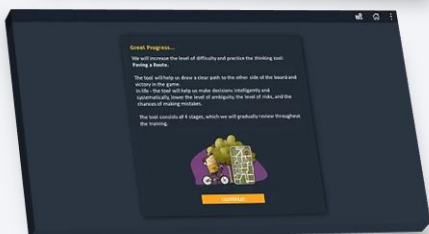

# Paving a Route

### Description:

Paving a route is a key concept in decision-making. This workout emphasizes the importance of identifying a critical path and taking active action - two essential principles that will improve our chances of sticking to decisions and achieving goals.

### About the game:

The game in this workout is called **Blocker** - a strategy game designed for two players. Each player is given a limited number of resources in the form of barriers that can help block the opponent's progress and pave the way for victory!

**Main Skill:**  
Decision-Making

**Sub-Skills**  
Calculation  
Adaptability  
Resource Management  
Prioritization

## Workout #3

# Dealing with a Change

### Description:

In this workout, you will get to know and practice a thinking tool called the Stoplight Method. The method will help us deal with changes.

The Stoplight Method is a meta-cognitive method that emphasizes our ability to detect changes ahead of time and adapt ourselves to changing situations.

### About the game:

The game in this workout is **2 Flags**. It's a two-player strategy game in which you must conquer the opponent's flag by harmoniously using five scouts (game pieces). To win, you will need to create a plan and execute it while overcoming the opponent's threats.

### Main Skill:

Adaptability

### Sub- Skills

Decision-Making  
Flexible Thinking  
Adaptability  
Planning

## Workout #4

# Identifying Anchors

### Description:

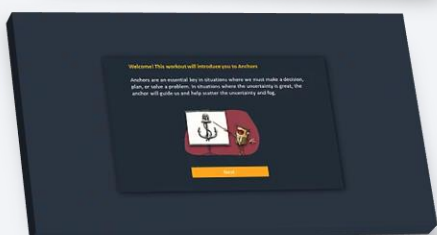

This Workout will focus on the tool: Identifying Anchors.

Anchors are an essential key in situations where we are required to make a decision, plan, or solve a problem.

In situations where the uncertainty is great, the anchor will guide us and help scatter the uncertainty and fog. Uncertainty or "fog" is a situation where what was obvious a moment ago is now in doubt, and the main difficulty is the inability to carry out a plan. The anchor is the constant thing that will remain stable and not change within the dynamic reality.

### About the game:

**PingWins** is a challenging puzzle game where we have to lead the penguin into the fishing hole. The path will not always be clear, and the solution lies in our ability to identify anchors!

### Main Skill:

Analysis and Deduction

### Sub- Skills

Problem Solving

Identifying Patterns

Following Move Order

Planning

## Workout #5

# Identifying Key Points

### Description:

Our world is constantly changing! Organizations face new laws, new regulations, changing trends, changes of political forces, and more... every day! Add to that changes in the workforce and constant pressure to improve performance and reduce risks. To ensure the smooth functioning of a business in a dynamic environment like the one we described, we must hold on to Key Points.

The workout will shed light on the importance of identifying and controlling Key Points. This is a management tool that will help us deal with dynamic environments characterized by frequent changes.

### About the game:

We will practice the 'Key Point' identification tool using the game **Elements**. Elements is a strategy game designed for two players. Both players try to gain control of the game board. Control will be achieved if you identify the key points and catch them before the opponent!

### Main Skill:

Decision-Making

### Sub- Skills

Calculation  
Planning  
Analytical Thinking  
Strategic Thinking

## Workout #6

# Creative Thinking

### Description:

Creative thinking is the process of nurturing your imagination allowing you to “think out of the box”. Being able to train your mind to think creatively helps you invent, problem-solve, create and communicate in fresh, new ways.

Creative thinkers are in high demand in the job market and creative thinking is one of the key skills needed in future jobs according to a recent report by the World Economic Forum.

### About the game:

The leading game in this workout is: **What's in the Box**. The game has no rules, only a set of operations you need to identify to move and advance between the levels. This unique game requires you to think outside the Box and involves lateral thinking, which is the ability to perceive patterns that are not obvious. The game involves and practices your multi-dimensional and multi-directional thinking as well as your mental flexibility

### Main Skill:

Creativity

### Sub- Skills

Identifying Patterns

Persistence

Following Move Order

Flexible Thinking

## Workout #7

# “The Eliminating Alternative Tool”

### Description:

This workout will focus on familiarity and practice with “The Eliminating Alternative Tool” - Proof by contradiction. Elimination is a powerful tool that can help us in the processes of analysis, decision making, and problem-solving. This may sound a bit trivial to you since you are probably experienced in eliminating options and use the method quite a bit in various contexts. But- many times, we rush to disqualify options because of a gut feeling or without having done an orderly process. In such situations, we may omit good possibilities that could actually bring us closer to a solution.

Proper application of the tool will improve your performance in many areas!

### About the game:

The leading game in this workout: **Enigma**  
Enigma deals with cracking a secret code. The objective of the game is to reveal your opponent's code before your code is revealed. But how? You only see the back of the opponent's code tiles and only see your code. Information gathering, Conclusions, Systematic work, and eliminating options are the skills that will help achieve the goal.

### Main Skill:

Analysis & Deduction

### Sub- Skills

Calculation  
Prioritization  
Analytical Thinking  
Efficiency

## Workout #8

# Resilience

### Description:

Have you ever wondered why some people stay calm in the face of surprises and changes while others lose peace and focus? People who can navigate life experiences effectively have a high resilience. Even if you consider yourself a strong person, you will inevitably encounter challenges at some point during your life journey. Your resilience is the key to turning challenges into successes.

In this workout, we will get to know the Alpinist Method - a useful strategy for developing resilience and successfully coping with life's challenges!

### About the game:

The leading game in this workout:

#### Climb Up

Its goal is to lead the alpinist to the top of the mountain. The climber can move from peg to peg with the help of his resources: pegs and ropes connecting them. Good plan, adaptability to the field, and resourcefulness - will lead the alpinist to the top!

### Main Skill:

Analysis & Deduction

### Sub- Skills

Persistence  
Problem Solving  
Following Move Order  
Planning  
Efficiency

## Workout #9

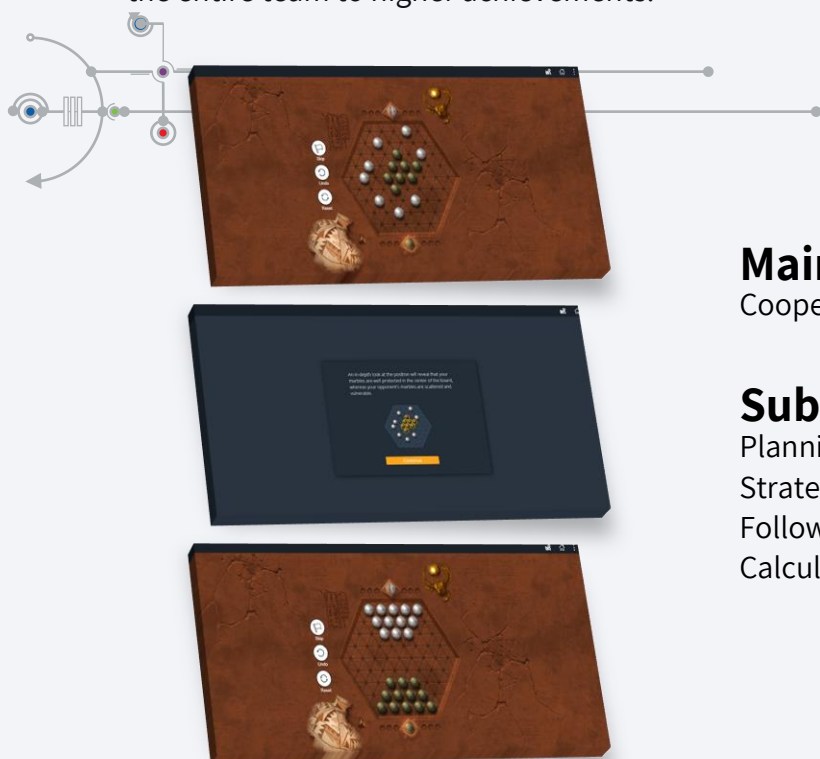

# Group Structure

### Description:

What is the connection between birds that migrate to warm districts and teamwork? What is unique about the migration birds is their group structure while during their flight. The group flies in a V-shape formation, with the group leader leading at the edge of the structure and taking on most of the effort. It is the uniqueness and synergy of flight in this way that reduce the friction of the air and increase the flight of the bird's wings in front of it. Flying in this structure is 70% more efficient and faster than flying a single bird. Therefore, the group can reach far distances. What can be deduced from this about teamwork? A team working together with the most suitable group structure will reach synergy and higher achievements. Unity for a common goal, a combination of talent diversity and mutual assistance, will bring the entire team to higher achievements.

### About the game:

The leading game in this workout: **Clash**  
Clash is a two-player abstract strategy game. Players are represented by opposing black and white marbles on a hexagonal board with the objective of pushing six of the opponent's marbles off the edge of the board. Only the correct structure of the group of your marbles will allow you to gain a significant advantage and win.

### Main Skill:

Cooperation

### Sub- Skills

Planning  
Strategic Thinking  
Following Move Order  
Calculation

## Workout #10

# Risk Management

### Description:

The purpose of the workout is to introduce a useful tool in the risk management process. The tool is called Prophylaxis. This is a term in Chess that means Preventative Action. In Chess, a prophylactic move is intended not only to improve the position of the chess player, but also as an action that prevents the opponent from improving a position or creating a threat. Risk management is an essential part of effective business planning. In the world of risk management, Prophylaxis or preventative thinking is the ability to identify potential problems before they occur so that actions can be planned to reduce or completely prevent the negative outcome in case these problems will be realized.

### About the game:

The leading game in this workout:

#### Lockdown

A strategy game that takes place in a secret high-tech lab. A sophisticated robot rebels and tries to escape. You must set up barriers and prevent the escape attempt. Soon after you start playing, you will understand that the game requires you to carry out a risk management process and to adopt a Preventive Thinking state of mind. Both are aimed to avoid situations where we find ourselves 'On the Rocks.'

### Main Skill:

Strategic Thinking

### Sub- Skills

Planning  
Calculation  
Resource Management  
Prioritization

# Accelium Group- Experts in Game-Based Learning and Assessment

Accelium develops higher-order cognitive, social and emotional skills using strategy games. Based on a scientifically proven methodology and adopted in over 40 countries worldwide, our unique learning process blends class instruction, personal coaching and state of the art digital learning. For the past 25 years, we've been introducing learners to the powerful strategic tools used by Chess Masters and Game Theory experts for analysis, problem solving, and decision making, helping them become more effective, methodical and resilient.
